
JOIN OUR TEAM: NOW RECRUITING A JUNIOR IOS DEVELOPER

Ineqe Group provides clients with a wide range of services, including consultancy, conferencing, training and technical solutions.

Ineqe Group is a small and dynamic company providing a close-knit and lively working environment, where all the staff work in a supportive and creative environment.

Following the launch of a number of high profile apps and in order to meet company expansion and a growing order book, Ineqe Group currently has a vacancy for the following position in our Belfast office.

The successful candidates will be joining the company at a key time as they roll out a number of innovative digital products, including a mobile learning platform.

Junior iOS Developer

With a substantial expanding order book for iOS Apps, Ineqe Group are now looking to recruit an additional iOS developer to assist our production team.

Ideally you will have a degree in computer science or similar but the role would suit an experienced programmer and may be available to a recently qualified developer with substantial experience of programming.

To be considered for the role you will already be familiar with iOS 9 and have experience in the design, implementation and testing of software.

The successful candidate will have practical experience, together with a positive attitude and good interpersonal communication and team working skills.

Responsibilities:

- iOS (iPhone & iPad) development in its entire life-cycle
- Stay on current iOS and mobile development technologies and industry trends
- Participate in product requirement and design reviews
- Develop time-estimates for work assignments
- Quickly adapt to new technologies and processes
- Maintain and add new functionality to exciting iOS applications
- Collaborate closely with other developers, designers and subject matter experts to define innovative UI and functionalities optimised for mobile platforms
- Deliver high quality work on tight schedules
- Attend customer meeting as part of the technical team
- Develop and grow your own personal programming skills

Skills:

- A strong understanding of Objective-C, iOS SDK, and UI guidelines.
- An excellent knowledge of Object-Orientated programming
- A degree in Computer Science or related field.
- Understand the importance of source code management and basic git usage
- Strong organisational and problem-solving skills
- Able to work in a team
- Experience of determining user requirements and developing applications to match these
- Ability to evaluate alternatives and understand business implications and impact
- Proactive and self-motivated
- Strong sense of ownership, urgency and drive.

Desirable:

- Published one or more iOS applications to the App Store
- Experience integrating REST APIs and/or dependency management
- Already learning Swift or eager to start.

To apply please send your current CV and one page covering letter to hannah@ineqe.com
